## **Detailed Narrative – Proposed Development**

The applicant is proposing a small-scale, home-based canine enrichment use at the property located at 3600 Thompson Rd., Seminole County, Florida. The property consists of an approximately one-acre parcel developed with a single-family residence.

The proposed use is intended to remain residential in character and low in intensity, and is designed to provide a structured, appointment-based canine enrichment experience for a limited number of dogs. The program is not intended to operate as a traditional dog daycare or kennel, but rather as a membership-based enrichment program focused on structured activity, mental stimulation, social balance, and rest.

### **Operations & Scale**

The use would be primarily owner-operated, with limited part-time assistance as needed. Attendance would be controlled through a standing weekly schedule, rather than drop-in participation, to ensure predictability and minimize daily traffic and activity levels.

Initial operations are anticipated to begin at a small scale, with approximately 3–5 dogs per day, allowing the program to establish routines and confirm compatibility with the surrounding residential environment. Participation levels would remain intentionally limited and managed through scheduling and enrollment practices.

### **Indoor & Outdoor Use**

Indoor activities would occur within an existing room of the primary residence, which includes a separate exterior entrance. This space would be used for scheduled rest periods, handling, feeding (if required), and climate-controlled care. No structural alterations to the residence are proposed as part of the initial phase.

Outdoor activity would occur within the existing yard area of the property under direct supervision. Activities would be conducted in short, structured rotations and balanced with indoor rest periods to prevent overstimulation.

### **Daily Rhythm & Management**

The daily rhythm of the program is designed to balance:

- Structured outdoor movement and activity
- Mental enrichment exercises
- Individual attention and handling
- Scheduled rest and decompression periods

Dogs are not engaged in continuous activity throughout the day. Instead, the program emphasizes predictability, calm transitions, and appropriate rest to support overall behavior and well-being.

### **Arrival, Departure & Traffic**

Arrival and departure would occur during designated windows and be managed safely by the operator. This approach minimizes congestion, noise, and on-site circulation and supports a calm environment.

There is no open public access, no walk-in traffic, and participation is by appointment only.

### **Compatibility with Surrounding Area**

The proposed use is designed to be compatible with the surrounding residential area by:

- Maintaining controlled scheduling and attendance
- Limiting prolonged outdoor activity
- Utilizing indoor rest periods to reduce noise
- Avoiding large group activity
- Preserving the residential appearance and function of the property

### **Purpose of Pre-Application**

The applicant is submitting this pre-application to obtain County guidance regarding:

- Whether the proposed home-based canine enrichment use is permitted under the current zoning designation
- Whether any additional approvals may be required
- Any applicable standards or limitations related to animal count, structure use, hours of operation, or site management

The applicant's intent is to ensure the proposed use aligns with Seminole County land development and animal service regulations prior to proceeding.
