Agenda: 8/30

Detailed Narrative for Proposed Rezoning of 9.39 Acres for a Recreational Vehicle Storage Facility in Seminole County, Florida

Dear Office of Seminole County,

I am pleased to submit this pre-application for the rezoning of a 9.39-acre parcel currently zoned A-1 (Agriculture) in Seminole County, Florida. The purpose of this request is to secure the appropriate zoning designation—whether it be Planned Development (PD), C-3 (General Commercial and Wholesale), or M-1 (Industrial)—to develop a thoughtfully engineered recreational vehicle (RV) storage facility.

Project Overview

The proposed project involves the development of a state-of-the-art outdoor RV storage facility on the subject property. This facility will cater to the increasing demand for secure, well-maintained RV storage options in the region. It will feature covered RV storage, thoughtfully engineered to maximize usage while minimizing any negative impact on the surrounding environment. The development will include solar panels on the covered structures, providing an environmentally sensitive solution that also allows for the charging of stored RVs.

Site Selection and Justification

The 9.39-acre site was selected due to its strategic location within Seminole County, offering convenient access to major highways and arterial roads, making it an ideal location for RV owners who require secure and accessible storage. The current A-1 zoning, which is primarily agricultural, does not allow for the type of commercial development needed to serve the growing demand for RV storage. Therefore, rezoning to either PD, C-3, or M-1 is essential to unlock the site's full potential and align with the county's long-term planning objectives.

Proposed Development and Use

The RV storage facility will be a meticulously planned development featuring spaces designed specifically for RVs of various sizes. The facility will include:

1. Security Features:

- Gated entry with 24/7 video surveillance.
- On-site management office with a presence during business hours.
- Perimeter fencing and controlled access points to ensure the safety of stored vehicles.

2. Design and Aesthetics:

- Landscaping buffers along property boundaries to maintain visual appeal and reduce any potential impact on neighboring properties.

- Use of environmentally friendly materials and sustainable construction practices.
 - Well-designed signage and lighting that complements the surrounding area without causing light pollution.
- 3. Infrastructure and Accessibility:**
- Paved access roads and parking areas designed to accommodate large RVs, with adequate turning radii and space for maneuvering.
 - Stormwater management systems to handle runoff and maintain the integrity of the surrounding environment.
 - Utility connections to support the facility's operational needs.
- 4. Customer Amenities:**
- Covered parking options for premium RV storage, equipped with solar panels to provide charging stations for RV batteries and electrical systems.
 - Waste disposal and wash areas designed to meet environmental regulations.

Benefits to the Community and County

This RV storage facility will bring several benefits to the local area and Seminole County:

- 1. Economic Impact:**
 - **Job Creation:** The development will create construction jobs during the build phase and permanent jobs once the facility is operational.
 - **Tax Revenue:** The facility will generate increased property taxes and contribute to the county's revenue stream.
 - **Local Business Support:** The presence of the facility will support local businesses, including RV dealerships, repair shops, and suppliers.
- 2. Addressing Market Demand:**
 - The growing popularity of RV travel has led to increased demand for secure storage facilities. This project will help meet that demand, providing a needed service to residents and visitors of Seminole County.
- 3. Enhancing Property Values:**
 - The development will enhance the value of surrounding properties by transforming underutilized land into a modern, attractive facility that meets a specific community need.
- 4. Environmental Considerations:**
 - The project will incorporate best practices in stormwater management, landscaping, and resource conservation, ensuring minimal environmental impact. The inclusion of solar-powered covered RV storage aligns with the county's sustainability goals.
- 5. Traffic and Infrastructure:**
 - The facility is expected to generate minimal traffic compared to other commercial uses, reducing potential strain on local infrastructure. All

access points and internal circulation will be designed to accommodate the safe movement of vehicles without disrupting local traffic patterns.

Compliance with County Plans and Objectives

The proposed rezoning aligns with Seminole County's Comprehensive Plan by promoting responsible land use and supporting the county's economic development goals. The PD, C-3, or M-1 zoning designations are appropriate for the proposed use and will ensure that the development is in harmony with the county's vision for the area.

Conclusion

In conclusion, the rezoning of this 9.39-acre parcel to accommodate a thoughtfully engineered RV storage facility represents a strategic investment in the future of Seminole County. The project is designed to meet the needs of the community while providing significant economic and environmental benefits. I respectfully request that the county consider this proposal favorably and look forward to working closely with all relevant stakeholders to bring this project to fruition.

Thank you for your time and consideration. I am available to discuss any aspects of this proposal further and to provide additional information as needed.

Sincerely,

A. Jon Roohparvar
